

## FOLLOW-UP STUDY OF 2008 GRADUATES IN TEACHING

### Career Services Office, University of Wisconsin-Stevens Point

---

This report provides data on the employment or continued educational status of UW-SP graduates of December 2007, May 2008 and August 2008. Research was completed within a year of graduation, with the report compiled for release in the spring of 2009. Statistical information is provided, as is a detailed listing of job titles, employers and locations for graduates. Note that the report represents individuals receiving their baccalaureate degree, not individuals who already have a degree and are adding teaching certification.

The Career Services staff makes numerous attempts to collect data from each graduate. Information in this report represents contact with 99% of the graduates or their families (212 of 215 graduates).

Readers using this information to make career decisions should always consult a career counselor, faculty member and/or other educational professionals.

### STATISTICAL REPORT CATEGORIES

Each graduate is counted only once, despite the fact that many complete multiple majors simultaneously. We generally list the person according to the major that appears first in the graduation printout from the Registration & Records Office. These occurrences are noted in our statistics with an asterisk and footnote.

Our categories and their explanations follow:

- Total Number of Graduates and Total Number Seeking: These categories distinguish between the total number of people graduating and the number who are entering the workforce/pursuing additional schooling. Percentages are calculated based on the number of graduates seeking employment or further schooling, not on the total number of graduates.
- Employed In Field: This category refers to individuals who report that their work is in an educational setting related to their academic study, or who we feel are working in an educational position that utilizes their college degree.

The report distinguishes between those employed full-time and those employed part-time in educational capacities. Full-time includes graduates employed 75% or more. Part-time includes individuals employed as teachers with less than a 75% contract, as well as individuals working as substitute teachers, coaches or educational aides.

- Employed Out of Field: This category refers to individuals reporting work that is not in a teaching setting. This includes both employment unrelated to the graduate's degree, as well as that which is related, but is not in an educational setting (ex: Biology major working as a Forestry Manager).
- Further Schooling: This category includes individuals who are continuing their education in graduate or professional programs, as well as those who are returning to school for an additional major or selected course work.
- Available: This refers to individuals who are actively seeking employment but have not yet accepted a position.
- Total Placed: This is the number of individuals who have secured some type of employment or are continuing their education.
- Not Seeking: These are individuals reporting that they are neither entering the workforce nor pursuing further schooling. (Number not included in percentage calculations.)
- No Report: This category includes graduates whom we were unable to reach, or who were unwilling to provide the requested information. (Number not included in percentage calculations.)

### DETAILED REPORT CATEGORIES

Information is organized alphabetically according to academic major with individual names omitted to maintain confidentiality. All types of employment are listed together (encompassing the statistical report categories of "employed in field" and "employed out of field"), followed by the list of further schooling reported. We list as much information as we acquire, and in some cases this is less than complete. Unless we were able to survey the graduate directly, we may have had difficulty obtaining all the details we request (specific job title, name and location of the employer and whether the position is full-time or part-time).

Many graduates pursue teaching certification in several fields by completing multiple academic majors or minors. This opens employment options in areas other than those in the academic major under which they are listed in our report. This helps to explain, for example, how a Foreign Languages major may report being employed as an English teacher.

\*\* Due to double majors, there were more graduates in this major than indicated. Double majors are normally counted and listed according to the major appearing first on the graduation printout from the Registration & Records Office. In addition to the teaching majors appearing above, Elementary Education contains seventeen Exceptional Education majors and one English major; Biology contains three Natural Science majors; Social Science contains nine History majors; and Foreign Language contains one English major. Seven non-teaching multiple majors are also included in this report: one Natural Science major in Biology; one Spanish major in English; one Spanish major in Exceptional Education; one Spanish major, one Physics major, and one Forestry major in Mathematics; and one Political Science major in Social Science.

**PLEASE NOTE:**

Percentages are calculated based on the total number of graduates seeking employment, not the total number of graduates.

In the Communicative Disorders field (Speech-Language Pathology), a Master's degree is required for certification in Wisconsin. Twenty-two MS degrees were conferred and 100% of the recipients were employed in the field.
