

FOLLOW-UP STUDY OF 2009 GRADUATES – NON-TEACHING

Career Services Office, University of Wisconsin–Stevens Point

This report provides data on the employment or continued educational status of UW–SP students graduating in December 2008, May 2009 and August 2009. Research was completed within a year from the date of graduation, with the report compiled for release in the summer of 2010. Statistical information is provided, as is a detailed listing of job titles, employers and locations of graduates.

The Career Services staff made numerous attempts to collect data from each graduate through e-mail, regular mailings, telephone surveys, faculty inquiries, and employer surveys. Information in this report represents contact with 85% of the non-teaching graduates or their families (1,220 of 1,433 graduates). A separate report is compiled for Education graduates.

Individuals using this data to make career decisions should always consult a career counselor and/or other educational professionals.

STATISTICAL REPORT CATEGORIES

Each graduate is counted only once, despite the fact that many complete multiple majors simultaneously. Individuals with more than one major are normally listed according to the major appearing first in the report from the Registration and Records Office. The asterisks and footnotes identify these occurrences in our statistical report.

Categories and their explanations:

- Total Number of Graduates and Total Number Seeking: These categories distinguish between the number of people graduating and the number who are entering the workforce or going on for further schooling. Percentages are calculated based on the total number of graduates seeking employment, excluding the Not Seeking and No Report categories.

- Employed In Field: This category refers to individuals who report that their work is related to their academic study or who are working in a position that utilizes their college degree. This category also includes individuals who are in volunteer service and those individuals reporting their primary employment to be in a branch of the armed forces.
- Employed Out of Field: This category includes individuals who report work that is not related to their academic study or who are working in a position that does not utilize their college background.
- Further Schooling: This category refers to individuals who are continuing their education in graduate or professional programs, as well as those who are returning to school for an additional major, selected course work, or teaching certification.
- Available: This category includes individuals who are actively seeking employment, but have not yet accepted a position.
- Total Placed: This is the number of people who have secured some type of employment or who are continuing their education. (This percentage is calculated based on the number seeking employment/additional schooling, not the total number of graduates.)
- Not Seeking: This category includes individuals who report that they are neither entering the work force nor continuing their education at this time. (This number is not included in percentage calculations.)
- No Report: This category includes individuals whom we were unable to reach or who declined to participate in our report. (This number is not included in percentage calculations.)

DETAILED REPORT CATEGORIES

Information is organized alphabetically according to college and academic major with individuals' names omitted to maintain confidentiality. All types of employment are listed together (encompassing the statistical report categories of "employed in field" and "employed out of field"), followed by the list of further schooling reported. We list as much information as we acquire, and in some cases that information is incomplete. Unless we were able to survey the graduate directly, it is often difficult to get all the details we request (job title, name and geographic location of the employer, type of additional education sought, school name and geographic location).

Questions or comments may be directed to the UW–SP Career Services Office:

NOTE: Percentages were calculated based on the total number of graduates seeking employment, not the total number of graduates.

** Due to double/triple majors, there were more graduates in this field than this number indicates. Students graduating with multiple majors are generally counted and listed with the major that appears first on the graduation printout from the Registration and Records Office.

Thirty-one additional Biology majors are included with other majors in the College of Natural Resources.

COLLEGE OF FINE ARTS AND COMMUNICATION
