FOLLOW-UP STUDY OF 2015 GRADUATES

Compiled by the Academic and Career Advising Center

This report provides data on the first destination employment or continued education of UWSP graduates from the classes of December 2014, May and August 2015. Research was completed within a year from the date of graduation, with the final report compiled/ released in July 2016.

Our staff made numerous attempts to collect information from each graduate through surveys, email and regular mail contacts, telephone calls, checks of social media sites and soliciting feedback from faculty/staff and employers. We were able to amass information on 89% of graduates.

STATISTICAL REPORT - categories and their explanations

The statistical report shows the *number of graduates within each major* and thus, due to people with multiple majors, the total number will be higher than the number of people graduating.

- **Total Number of Graduates and Total Number Seeking:** These categories distinguish between the number of people graduating and the number who are entering the workforce or going on for further schooling. Percentages are calculated based on the total number of graduates seeking employment, excluding the *Not Seeking* and *No Report* categories.
- **Employed In Field:** This category includes individuals who report that their work is related to their academic study or who are working in a position that utilizes their college degree. This category also includes individuals who are in volunteer service and those individuals reporting their primary employment to be in a branch of the armed forces.
- **Employed Out of Field:** This category includes individuals who report work that is not related to their academic study or who are working in a position that does not utilize their college degree.
- **Further Schooling:** This category includes individuals who are continuing their education in graduate or professional programs, as well as those who are returning to school for an additional major, selected course work or teaching certification.

- **Available:** This category includes individuals who are actively seeking employment but have not yet accepted a position.
- **Total Placed:** This is the number of people who have secured some type of employment or who are continuing their education. (This percentage is calculated based on the number seeking employment/further schooling, not the total number of graduates.)
- **Not Seeking:** This category includes individuals who report that they are neither entering the work force nor continuing their education at this time. (This number is not included in percentage calculations.)
- **No Report:** This category includes individuals who we were unable to reach or who declined to participate in our report. (This number is not included in percentage calculations.)

DETAILED REPORT - notes

The detailed report shows all information from the *Employed in Field*, *Employed Out of Field* and *Further Schooling* statistical report categories.

Information is organized alphabetically according to college and academic major with individuals' names omitted to maintain confidentiality. We list as much information as we acquire and, in some cases, that information is incomplete.

Many students pursue multiple and sometimes diverse academic majors and/or minors. Once graduated, if they find work related to one of these areas they are counted as *Employed in Field*, even if the job does not appear relevant to their other field(s) of study.

Please Note:

Percentages are calculated based on the total number of graduates seeking employment, not the total number of graduates.

In the Communicative Disorders Field(Speech-Language Pathology), a Master's degree is required for certification in Wisconsin. Thirty - eight MS degrees were conferred, and 100% of the recipients who reported employment were wither employed in field or pursuing further schooling. Also in the Communicative Disorders field , seven Doctor of Audiology degrees were conferred with 100% of the recipients who reported employment were in the field.
