

FOLLOW-UP STUDY OF 2017 GRADUATES

Compiled by the University College Academic and Career Advising Center

This document presents self-reported data provided on the first destination employment or continued education of UWSP graduates from the undergraduate classes of: Summer 2016, Fall 2016, Winterim 2017, Spring 2017, and Summer 2017. Surveys were open until December 2017, with the final report compiled/released in January 2019. Data from Summer 2016 – Spring 2017 was collected via the GradLeaders, Inc. The Outcomes Survey (TOS) while data from Summer 2017 was collected via the Handshake, Inc. First Destination Survey (FDS).

Academic and Career Advising Center staff made numerous attempts to collect survey information from each graduate through outreach methods such as in-person appointments, emails, telephone calls, and through information provided by faculty, staff, and employers. The ACAC recommends that the office of Institutional Research (or an appropriate institutional office/department/area of campus assessment) assume primary lead (responsibility) for future design, compilation, assessment, and application of collected graduating student and employment data such as that within the First Destination Survey (FDS).

STATISTICAL REPORT (Categories & Explanations)

Collected information within the report is based on self-reported data as well as major listings pulled from the University's Student Information System (SIS).

Total Reported Graduates within College – Represents the total number of self-reported graduates who responded to the survey within each college (Fine Arts and Communication; Letters and Science; Natural Resources, Professional Studies).

Majors – The majors listed include their respective major-concentrations. Double-majors are not included within the report as this information has not been effectively collected to provide an accurate representation of employment (as correlating with major) within the self-reported data from graduating classes. The selection of the major to be utilized within the compiled survey data was based on the comparison of the graduate's self-reported data with the SIS primary major listing.

Percentages are calculated and compared to the represented major groupings within each specific college and goes on to demonstrate comparisons between "destination" categories within each major grouping within each college.

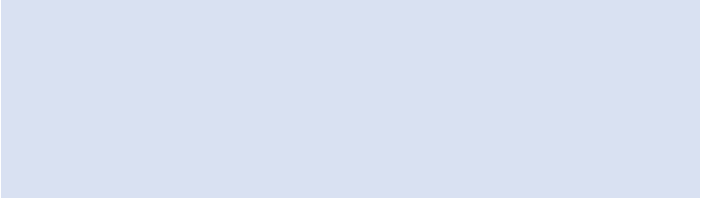

Salary – Parameters (removing anything under \$10,000 and above \$135,000) were utilized to account for outliers and reported, nonsensical information within presentation of salary data. Respondent annual salaries were calculated when hourly wages were entered.

Employers – Self-reported information is broken out by College and includes employer name, location, and position title for full-time positions; employer name and position title for part-time positions; and name of institution for those furthering their education.

Questions / Comments: Contact the Academic and Career Advising Center via email (acac@uwsp.edu) or by telephone (715)346-3226. The primary duty of Academic and Career Advising Center personnel is to provide academic and career advising to UWSP students and to collaborate with faculty and staff to offer quality, student support and academic experiences. Every effort will be made to respond to questions relating to the FDS, however, academic and career advising support for students must take priority and so responses to questions may take longer than expected. **DISCLAIMER:** The data presented within this report is but one source of data and should not be utilized as sole resource for choosing an academic major or making career decisions.
