

# **Biology Major Assessment Report**

## **PLO 4: Fall 2018**

### **Program Learning Outcomes (PLOs)**

The program learning outcomes were revised since our last full assessment report in Spring 2015, approved by the Department of Biology on 11 September 2015.

Upon completion of the Biology Program, students will be able to:

1. Recognize the multiple levels of complexity at which biological systems operate, from molecules to ecosystems and the biosphere, and explain the emergent properties and processes characteristic of each level.
2. Describe mechanisms for the continuity of life, including the processes of inheritance, development, and evolution.
3. Demonstrate proficiency in the methods and philosophy of science, including articulation and application of the Scientific Method, collection and analysis of biological data, and application of professional ethics.
4. Critically evaluate and synthesize biological information from multiple sources, including the primary scientific literature, and communicate biological knowledge to both professional and non-professional audiences.
5. Articulate the application of biological science to meeting the needs of society, including basic research, stewardship of biodiversity, human health, and entrepreneurial innovation.

Our focal program learning outcome for this report is PLO 4.

## Curriculum Map

The Biology curriculum map depicts the required courses for the Biology major. Courses indicated with an 'M' provide mastery for achievement of some component of a learning outcome. By completing the Biology Curriculum, it is expected that students should meet all five Program Learning Outcomes.

	BIOL (110 & 111)   (130 & 160)	CHEM 220   325	MATH 111   225   255	BIOL 210	BIOL 270	BIOL 302   (314 & 320)	BIOL 351   381   385	BIOL 305 & 306	BIOL 490
PLO1	PR	PR				M			
	Molecules					M			
	PR					M			
	Cells								
	PR						M		
	Organisms							M	
	PR								
	Ecology								
PLO2	PR								
	Reproduction						M		
	PR								
	Genetics			D		M			
	PR								
	Evolution				M				
PLO3	PR								
	Scientific Method				D		M	M	
	PR								
	Data Analysis		PR		D		M	M	
PLO4	PR								
	Communication				D				M
PLO5	PR								
	Valuing Biology			D	D	D	D	D	M

PR = pre-requisite      D = developing      M = mastery

### Summary of Previous Results

Our assessment process has been revised since our last report to the Assessment Subcommittee in our *HLC Progress Report: Interim Assessment Reports for 2013-2014* and our last full assessment report (2015), and our previous results were not reported in a format compatible with our current methods. However, in the Fall 2015, we assessed students in BIOL 490 *Senior Seminar* for achievement in PLO 4 using a rubric similar to our current one (see attached). Those results are presented in the table below.

Student achievement in Knowledge, Skills, and Dispositions related to PLO 4 was assessed separately, with each category of achievement corresponding to an ordinal Likert score from 1-4, as described below. A score of 3 (*met*) was considered meeting the learning outcome for each category.

The median score in each category was a 3 (*met*) and the mode 4 (exceeded). Overall, between 50% and 67% of students met each category of PLO 4.

#### *Summary of Previous Results from Fall 2015.*

<b>Categories</b>	1 <b>not met</b>	2 <b>partially</b>	3 <b>met</b>	4 <b>exceeded</b>	<b>median</b>	<b>% met</b>
<b>Knowledge</b>	9	23	8	24	3	50%
<b>Skills</b>	5	16	13	30	3	67%
<b>Dispositions</b>	9	16	12	27	3	61%

### Brief Description of Previous Actions

Since Fall 2015, the Biology Department has revised our program curriculum, instruction, and assessment methods in order to improve student achievement with regard to PLO 4 and how we measure it.

Before Fall 2015, our 2 credit BIOL 490 *Senior Seminar* had as its only prerequisites to be a Biology Major with Senior Standing. As part of our program Communication in Major course sequence, we subsequently added a prerequisite 4 credit BIOL 270 *Ecology & Evolution* specifically to provide instruction in the knowledge, skills, and dispositions associated with PLO 4.

After our 2016 GEP assessment of BIOL 490 as a Communication in the Major and Capstone course, we also standardized the written and oral communication assignments among the various instructors.

To comply with reporting requirements from the Assessment Subcommittee, an “overall” category was appended to the assessment rubric to evaluate student achievement across all categories simultaneously.

### **Assessment Strategies/Measures/Techniques/Methods**

PLO 4 was assessed for Fall 2018 in BIOL 490 *Senior Seminar*, the course serves to complete the GEP Capstone and Communication in the Major requirements for Biology majors. Senior standing is required for BIOL 490.

A single document with assessment rubrics (see attachment) for PLOs 4 & 5 were distributed to all seven BIOL 490 instructors to evaluate student achievement based on their Capstone/Communication in the Major projects. The rubrics have four achievement levels: *not met*, *partially met*, *met*, and *exceeded*, and these correspond to ordinal Likert values of 1-4. The PLO 4 rubric breaks down the outcome into specific knowledge, skills, and dispositions, and students have met the PLO (overall) if they achieved a level of *met* or higher in two of the three categories.

It is expected that almost all students that have taken both BIOL 270 and BIOL 490 (i.e., completing the Communication in the Major requirement) should meet the learning outcome, but increasing the percentages of students meeting each category (and overall) to above 67% would be an improvement.

### **Assessment Results/Findings/Interpretation**

Six of the seven BIOL 490 instructors returned completed rubrics for PLOs 4 & 5. Sixty-eight total students were assessed. Four instructors based their assessments on individual student papers and presentations, one assessed a only final paper, and one assessed group papers and presentations. Only results for PLO 4 are reported herein.

Sixty-four of 68 (94%) of the students met or exceeded PLO 4 based on the Overall assessment. Forty-five exceeded the expected outcome (66%), resulting in a median score of 4.

Results for each of the three categories of Knowledge, Skills, and Dispositions have improved since Fall 2015 since the addition of BIOL 270 to the curriculum. Across the three categories, the percentage of students meeting expectations ranged from 79%-88%, representing increases of 18%-29%. For the Knowledge and Overall categories, median student achievement exceeded expectations.

#### *Summary of Current Results from Fall 2018.*

<b>Categories</b>	<b>1 not met</b>	<b>2 partially</b>	<b>3 met</b>	<b>4 exceeded</b>	<b>median</b>	<b>% met</b>
<b>Knowledge</b>	1	13	19	35	4	79%
<b>Skills</b>	1	9	28	30	3	85%
<b>Dispositions</b>	1	7	30	30	3	88%
<b>Overall</b>	0	4	19	45	4	94%

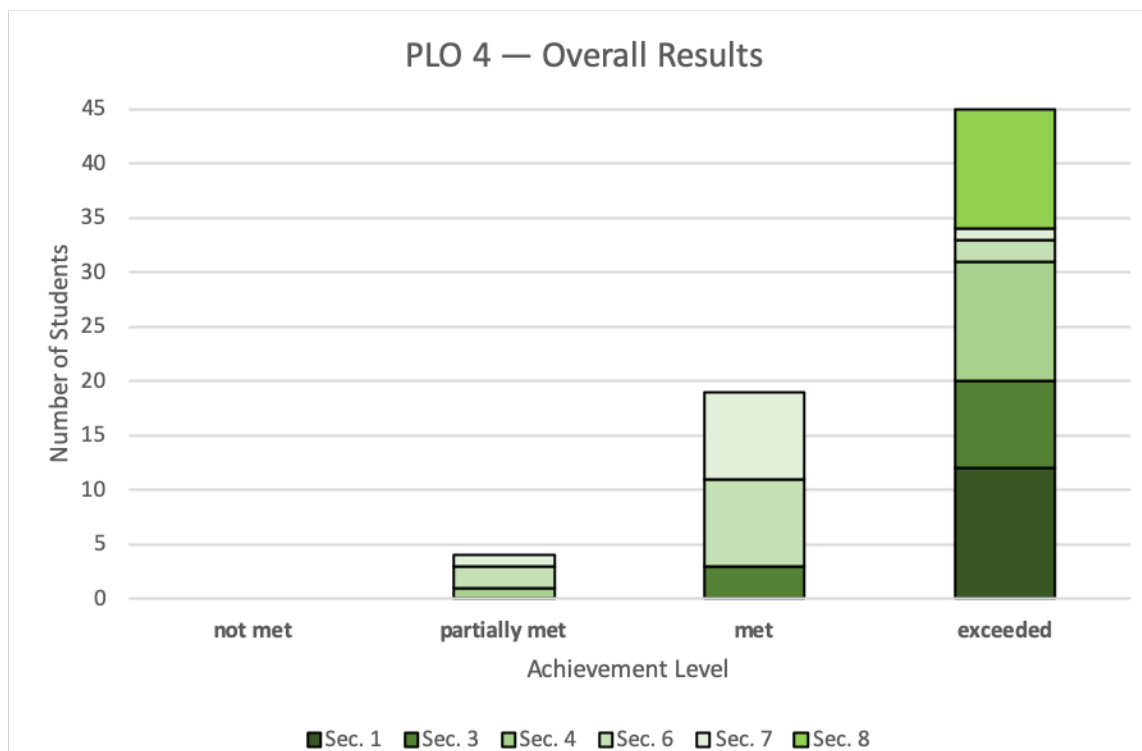

Chart of Current Results by Section for Overall Achievement in Fall 2018.

### Implications / Actions

Having developed a curriculum sequence that resulted in improved student achievement for PLO 4, it was suggested by the Biology Department Assessment and Program Review Committee that the rubric be revised to refine expectations for student achievement. Specifically, the Overall category rubric could be revised to raise the criteria for meeting and exceeding expectations. The current standards leave little room for improvement.

In addition, it was also recommended that specific achievement goals be developed for BIOL 270 in preparation for higher achievement in BIOL 490.

### Dissemination of Findings

These results were presented to the Department of Biology on 25 January 2019.<sup>1</sup> The document will be stored on the Biology SharePoint site.

<sup>1</sup> Actually, a *version* of this report was approved by the Department of Biology for the *2018-2019 Interim Campus Labs Assessment Report*. This sample report was streamlined for the purpose of discussion.

### Updated Five-Year Plan

The Department of Biology five-year assessment plan is simple: we assess all five PLOs each semester in BIOL 490. PLOs 1-3 are assessed using a comprehensive exam. All BIOL 490 Biology Majors (i.e., not Biochemistry majors) are required to take the exam or receive an Incomplete for the course. Otherwise, the outcome of the exam has no impact on the students' grades. PLOs 4-5 are assessed using common rubrics (attached) based on students' Capstone/Comm. in the Major projects, and PLO 5 is also indirectly assessed via an exit survey administered to all BIOL 490 students.

PLOs will be reported sequentially over the 5-year cycle.

#### *Overview Biology Program Assessment Plan for Fall and Spring Semesters in BIOL 490.*

PLO	Comprehensive Exam	Embedded Assessment	Exit Survey
1	X		
2	X		
3	X		
4		X	
5		X	X

year	PLOs to be Assessed	PLO to be Reported
2018	all PLOs, Fall and Spring	PLO4 (current)
2019	all PLOs, Fall and Spring	PLO1
2020	all PLOs, Fall and Spring	PLO2
2021	all PLOs, Fall and Spring	PLO3
2022	all PLOs, Fall and Spring	PLO5
2023	all PLOs, Fall and Spring	PLO4
