**SCHEDULE** 

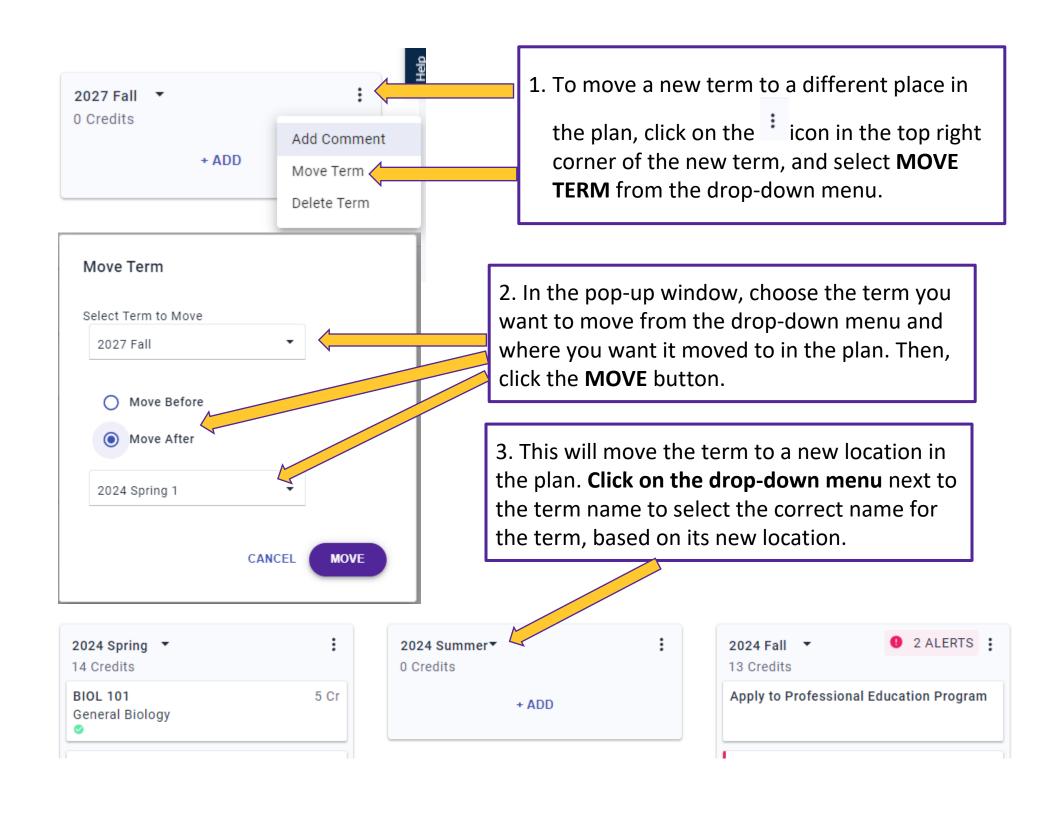

There are two ways to add a term to an academic plan. Either **click the** icon at the top of the academic plan, or click **+ADD TERM** following the last term in the plan. This will add a new term to the end of the academic plan.

## **Adding and Deleting a Class**

s open for 2023 Fall. <u>Start building your schedule now</u>

 Continue adding courses to the plan by clicking +ADD and searching for courses.

2. If a course does not initially appear on the drop-down, continue typing the course prefix and number until it appears.

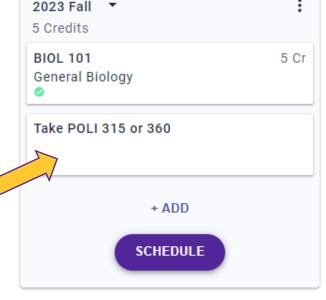

## **Adding a Placeholder**

 A placeholder can be used when a student can choose from a variety of courses. To add a placeholder, click +ADD and then choose Placeholder.

2. When the text box appears, type a name for the placeholder. Be as specific as possible so both the adviser and student can easily determine what this placeholder is for. Then, click the text below the textbox that says, "Add ..."

3. Click on the new placeholder to edit.

- 1. The title of the placeholder will self-populate.
- 2. Enter the credits. If all classes are the same number of credits, enter that number as both the min and max credits.
- 3. Enter any directions you desire into the Description box. Then, **click the toggle** to activate Course Placeholder.
- 4. Type the courses that fulfill this placeholder into the text field and select the courses as they appear from the drop-down. Then, click SAVE.

When a student clicks on the placeholder in their plan, they will only see the classes you entered as options on a drop-down menu.
