Title: A Boating Choice Model for the Valuation of Lake Access

Authors: Christos Siderelis, Gene Brothers, & Phil Rea

Journal: Journal of Leisure Research, vol.27

Date: 1995

Pages: 1-19(KB 12/4/08)H

Abstract:

This study attempts to unravel why a boater chooses a certain lake or lake access. The authors study how boater's make choices when there are multiple landings and lakes and reviews their willingness to pay for these benefits.
