Native Plant Network - Propagation Protocol Database:

This network is devoted to the sharing of information on how to propagate native plants of North America (Canada, Mexico, and US). Feel free to search the database for species you have interest in growing in your area: < <http://www.nativeplantnetwork.org/network/search.aspx?SearchType=Continental> >.

Native Plant Journal:

This journal began as a cooperative effort of the USDA Forest Service and the University of Idaho, with assistance from the USDA Agricultural Research Service and the Natural Resources Conservation Service. Now published through the University of Wisconsin Press, their goal is to provide technical and practical information on the growing and planting of North American (Canada, US, and Mexico) native plants for restoration, conservation, reforestation, landscaping, roadsides, and so on. < <http://www.nativeplantnetwork.org/Journal/> >.
