

Forest Management for White-tailed Deer

October 4, 2023 | 9 am – 4 pm | Maiden Rock, Wis.

Learning Objectives

- Understand basic deer ecology including their habitat requirements and how their requirements vary seasonally.
- Explain how to use silvicultural treatments to increase forage production and where/when they are appropriate.
- Identify where and how to incorporate cover to meet the year-round needs of deer.
- Explain how to account for deer home range size within forest management plans.

Tentative Agenda

9:00-9:15 a.m.	Welcome and Introductions
9:15-10:00 a.m.	Deer Population Ecology
10:00-10:20 a.m.	DMAP Overview
10:20-10:30 a.m.	Break
10:30-10:50 a.m.	Navigating a Cross-Boundary Project
10:50-11:30 a.m.	Pierce County Properties
11:30-11:50 a.m.	Complying with MFL while Focusing on Wildlife Habitat
11:50 a.m.-1:00 p.m.	Lunch and Travel to Field Site
1:00-3:30 p.m.	Elements of Deer Habitat in the Field
3:45-4:00 p.m.	Managing for Deer and Their Habitat and Differing Spatial Scales
4:00 p.m.	Workshop Wrap-Up
