

## TESTS FOR PRIVATE WELL WATER

**Bacteriological testing requires 24 hours setup time.** The lab will not accept samples for bacteria analysis on any Friday and Jan 17, May 30, July 4, Sept 5, Nov 23-25, Dec 26, 2022.

**HOMEOWNER PACKAGE** (Includes tests 1-8)..... \$60.00

This package consists of the following analyses which can be run separately for price indicated.

1. **Total Coliform Bacteria** (includes *E-coli* result when bacteria is present)..... 28.00  
 Test the bacteriological safety of a water supply. **Priority analysis (48 hour turnaround)...56.00**
2. **Nitrate plus Nitrite-Nitrogen** ..... 20.00  
 These are the most common chemical contaminants in Wisconsin groundwater. They may also serve as an indicator of the presence of other contaminants, such as pesticides or trace organic chemicals from septic system effluent. **Priority analysis (48 hour turnaround)... 40.00**
3. **pH** ..... 11.00  
 Measure of relative acidity of the water. Useful in assessing the corrosivity of water to plumbing.
4. **Alkalinity** ..... 12.00  
 Amount of bicarbonate (*acid neutralizing capacity*), the major anion in water, related to pH and corrosivity.
5. **Hardness**..... 12.00  
 Measure of the amount of calcium and magnesium carbonates. Important if water softening is considered.
6. **Chloride** ..... 20.00  
 Indicates contamination from septic systems, fertilizer, landfills, or road salt.
7. **Conductivity**..... 11.00  
 Measure of total dissolved minerals in water. Change in conductivity or unusual ratio of conductivity to hardness may signal presence of contaminants.
8. **Corrosivity Index**..... 28.00  
 This measures the tendency of water to be corrosive or scale forming.

Homeowner Package **plus Fluoride** (Requires an additional bottle)..... 79.00  
**Fluoride** ..... 22.00

**Bacteria Count** (Quanti-tray method) .....39.00  
 Provides an estimate of the number of bacteria colony forming units. Includes *E.coli* result when bacteria is present. This test can be useful if diagnosing or trouble shooting a well with a history of bacteria positive samples.

**METAL PACKAGE** (Requires an acidified bottle) ..... **57.00**

Individual metals are \$27/element.

Arsenic (screen), Calcium, Copper, Iron, Lead (screen), Magnesium, Manganese, Potassium, Sodium, Sulfur (SO<sub>4</sub>), and Zinc.

**COMPREHENSIVE HOMEOWNERS PACKAGE** ..... **146.00**

Includes – Homeowners Package, Metals Package (above) and DACT (atrazine screen)

Additional savings on our already discounted packages!

**LOW-LEVEL LEAD AND ARSENIC** (by ICP/MS) ..... **53.00**

**Priority analyses may be run on any of the above samples for double the listed price.**

**Please contact the lab to confirm availability prior to submitting samples.**

**PESTICIDE ANALYSES**

*Call the laboratory for bottles.*

Diaminochlorotriazine screen (DACT) (a breakdown of atrazine and related herbicides) .....	35.00
Nitrogen and Phosphorus (N/P) containing pesticides .....	132.00
Chloroacetanilide Metabolites (CAAM) – 6 compounds.....	100.00
Nitrogen and Phosphorus containing pesticides + Chloroacetanilide Metabolites (NP/CAAM) .....	184.00
Neonicotinoid Insecticides.....	210.00

**PHARMACEUTICALS AND PERSONAL CARE PRODUCTS**..... 210.00

*A screening tool used to identify compounds unique to human use. Can indicate human wastewater (septic) impacts on a well or surface water body.*

**WATER & ENVIRONMENTAL ANALYSIS LAB**

DNR Certification No. 750040280      DATCP Certification No. 115097-D3

**CERTIFICATIONS FOR NON-POTABLE WELL WATER** – *alkalinity, ammonia, chemical oxygen demand, chloride, chlorophyll- $\alpha$ , total hardness, Total Kjeldahl nitrogen, metals, nitrate + nitrite, total organic carbon, orthophosphate, total phosphorus, total dissolved solids, total suspended solids, total residue.*

**CERTIFICATIONS FOR POTABLE WATER**

Nitrate + Nitrite –N

Bacteria – coliform and *E. coli* (Quanti-tray, Colilert, or Colilert-18)

**For sampling instructions and bottles contact:**
