DATA SOURCES

Visible structures field inventoried by citizens of Moose Lake in Sawyer County, Wisconsin, 2008. The riparian inventory was conducted by boat in the littoral zone of Moose Lake during full leaf-on tree canopy conditions. Only structures visible to the naked eye were documented. Locations of structures were affixed to large-format, hardcopy maps and assigned a personal identification number. Attributes, indicating type of structure, were recorded in a log book.

Hardcopy maps were scanned, georeferenced to the Sawyer County Coordinate System, and digitized to the Moose Lake shoreline geodatabase by Douglas Miskowiak, UW-Stevens Point.
