Welcome to LIFE

LIFE (Learning Is ForEver) is a membership-based organization of adult learners providing an opportunity to share learning experiences and discover new joys. It is sponsored by University of Wisconsin-Stevens Point and hosted by Continuing Education and Outreach. All instructors are volunteers.

Designed to meet your needs and interests, the LIFE program provides new learning opportunities on a variety of topics in an array of formats, including:

- Peer Teaching and Learning
- Lectures by Visiting Experts
- Theater and Sports Events
- Field Trips

What Does LIFE Offer?

Since members are the heart of the LIFE program, courses are developed based on member interests. Some classes meet weekly for two to four weeks while others meet once. Courses and events are offered during two terms:

- Summer/Fall (July - December)
- Winter/Spring (January - June)

A LIFE membership includes one term. One bi-annual membership fee (\$45) entitles you to participate in as many courses as you wish and select discounted UWSP programming for one semester.

Course Registration

LIFE classes for Fall 2020 will be for members only unless otherwise indicated. Wait lists will only be used in the case of limited numbers due to tour or class space. Please, do not arrive more than 20 minutes prior to class start time.

Notices of class changes will be emailed and posted on our website and Facebook page. We will no longer make phone calls to those that do not have an email address on file since classes are now open enrollment.

Payments for membership and special events are due with your registration, unless paying by check. Since we must make financial commitments for tickets, dining, and coach service in advance, **no refunds will be issued for cancellations.** However, you may send a substitute in your place.

Note on LIFE's Curriculum

We hope you will enjoy the wide array of classes and activities offered this semester. LIFE's Curriculum Committee (a volunteer group of your fellow members) is always looking for fresh class ideas and new presenters.

If you are interested in leading a class or trip, please contact any of the curriculum committee members, attend a curriculum meeting (dates listed on calendar page), or better yet, join the committee! Email the Curriculum Committee or the LIFE Board at UWSPCELIFE@uwsp.edu.

Important Notes

Open Enrollment

There are two elements to our open enrollment. It needs to be emphasized, however, that these changes are for **CURRENTLY REGISTERED MEMBERS**, not for non-members.

The first element of open enrollment is the elimination of wait lists. Except for classes and field trips that have expressed limits, all registrations for classes will be unlimited. The rationale for this is that we never have had too few seats for classes, even those that have had high enrollments. People's lives and schedules sometimes change between registration and attendance, and because of that we are anticipating that we will be able to accommodate all those who come.

The second element is that if you have not signed up for a particular class and decide mid-semester that you do want to attend it, you would be welcome without notifying anyone. This does not apply to those classes and field trips that have stated limits, of course.

Looking forward to seeing you this semester!

*Horace Davis,
President of LIFE*

LIFE BOOK DISCUSSION

Discussion of the book, "Madame Bovary" by Gustave Flaubert. Emma Bovary is beautiful and bored, trapped in her marriage to a mediocre doctor and stifled by the banality of provincial life. An ardent devourer of sentimental novels, she longs for passion and seeks escape in fantasies of high romance, in voracious spending and, eventually, in adultery. But even her affairs bring her disappointment, and when real life continues to fail to live up to her romantic expectations, the consequences are devastating. Flaubert's erotically charged and psychologically acute portrayal of Emma Bovary caused a moral outcry on its publication in 1857.

THE CONSTITUTION DIS-INTERPRETED

For years, politicians, law professors, and judges have “interpreted” the U.S. Constitution, creating a political system the founding generation would scarcely recognize. We will “dis-interpret” the Constitution and explain it through the eyes of those who ratified it, examining some of the most important provisions and clauses. As James Madison wrote “In that sense alone it is the legitimate Constitution.”

PORTAGE COUNTY IN WORLD WAR II

Both men and women played extensive and, in some cases, unique roles in World War II. Our museum presentation is a 75th anniversary remembrance of their contributions to the war effort both at the front and at home.

Residents from this county found themselves in every theater of the war and many would have experiences that seem difficult to comprehend today. We can not tell the story of every person involved in the war effort but we have tried to give the visitor a sense of the roles played by individuals of this county in the conflict.

EVOLUTION OF AVIATION SECURITY

The events of September 11, 2001 forever changed our way of life, as well as our nation's aviation security operations. Since then, there have been numerous changes to aviation security and its technologies. Dr. Laura Albert started research on aviation security in 2001, where she proposed a risk-based aviation screening paradigm to address logistical challenge of screening nearly 700 million passengers per year in a cost-effective manner. Her research served as the model for the TSA PreCheck paradigm and helped facilitate its launch by the Transportation Security Administration.

LIFE BOOK DISCUSSION

Discussion of the book, "Black Like Me" by John Howard Griffin. In the Deep South of the 1950s, journalist *John Howard Griffin* decided to cross the color line. Using medication that darkened his skin to deep brown, he exchanged his privileged life as a Southern white man for the disenfranchised world of an unemployed black man. His audacious, still chillingly relevant eyewitness history is a work about race and humanity—that in this new millennium still has something important to say to every American.

Monday, October 12

1:00-2:30 p.m.

Location: Zoom Meeting

Presenter: Anne Rogalski (LIFE Program Manager)

LET'S HAVE A CONVERSATION ON 'RACE'

On both sides of the race relations divide we criticize, accuse, malign and label. We refuse to face it head on and it seems we do not know how to do it. I believe that ignorance of the history on both sides of the race divide, and the commonality which exists form the knowledge base necessary to have the conversation. Also, with this is the lack of willingness to talk face-to-face about race. So in this two-part lecture/discussion let us get together and begin/continue the discussion.

BETWEEN MODELS AND MYTH: SCIENCE IN THE MIDST OF A PANDEMIC

Mary Midgley famously compared philosophy to plumbing, noting that both are important but often ignored, that is, until something goes wrong. With the coronavirus pandemic, it is clear that something has gone wrong. Certainly, many social and environmental problems are highlighted by the pandemic, but I will focus on the lessons relating to our scientific practices and their political consequences.

We will pay special attention to the several houses that have been carefully and lovingly—and expensively—restored in the past 20 years or so. Not only have these houses been "recalled to life," but their restorations have revived the city's finest historic neighborhood to flourish for another century. We will turn north on Phillips Street, and return west on Main Street, with the same goals in mind.

WALKING TO SELF RENEWAL

Exploration of historical and social aspects of the (France to Spain) Pilgrimage of St. James infused into a contemplative walk which did not start as a search for answers or life direction as many have used the pilgrimage for. It was a walk of wonder, with the feeling of being in a cabinet of curiosities where each day offered new and meaningful experiences while allowing me to also have quiet time away from the frenetic antics of electronic connection in a modern world.

LIFE BOOK DISCUSSION

Discussion of the book, "The Edge of the Orchard" by Tracey Chevalier. From internationally bestselling author Tracy Chevalier, a riveting drama of a pioneer family on the American frontier

1838: James and Sadie Goodenough have settled where their wagon got stuck - in the muddy, stagnant swamps of northwest Ohio. They and their five children work relentlessly to tame their patch of land, buying saplings from a local tree man known as John Appleseed so they can cultivate the fifty apple trees required to stake their claim on the property.

Chevalier tells a fierce, beautifully crafted story, her most graceful and richly imagined work yet.
