

B AUTODESK® BIM 360® DESIGN

Real-time collaboration and data management for Civil 3D projects

BIM 360 Design enables Civil 3D teams to collaborate and manage their data across the project lifecycle to improve project outcomes.

Benefits

Anytime, anywhere collaboration

Securely create and access Civil 3D files in real time. Review design development from any device with your extended team for faster, more efficient collaboration.

Visualize Design Changes

No more hunting for revision clouds. See how new information will impact ongoing work to help streamline decision-making and lines of approval.

Single Source of Truth

Centralize Civil 3D files and data management on a common data platform to reduce data silos and keep teams on the same page.

Capabilities

BIM 360 Design is a design collaboration and data management product for AEC projects. Now architects, engineers, contractors and extended project team stakeholders can seamlessly collaborate to improve project outcomes.

A. Basic file sharing and data exchange – Share active design documents with read/write access and set user permissions on a folder and project level.

B. Cloud-based design file and data referencing access – Design collaboration in real-time with remote, co-located, or multidiscipline teams outside company firewalls.

C. Version control and file compare – Access previous design file versions at any time. Compare file iterations and sheet layouts either in side-by-side or overlay view to track design changes.

D. Submittal coordination – Track and share deliverables against deadlines in a common project repository.

E. Identify issues & create markups in the office or on mobile devices – Allow extended stakeholders such as Principals and Project Managers to review design progress and follow up on outstanding changes.

F. Data centralization in a single repository throughout the project lifecycle – Connect data throughout the project lifecycle to reduce errors, increase accountability, and accelerate project delivery.

Connect, organize & optimize your projects with BIM 360

BIM 360 Docs is the common data platform for BIM 360 and is included in the three additional BIM 360 subscription offerings (Design, Coordinate, and Build).

B AUTODESK® BIM 360® DESIGN

Connect teams, enable secure real-time design collaboration, manage the exchange of design data, and easily understand design changes.

KEY CAPABILITIES:

- Civil 3D collaboration
- Revit Cloud Worksharing
- Access control
- Tracking & timeline
- Coordinate deliverables and transmittals
- Change visualization
- Assign issues & add markups

B AUTODESK® BIM 360® COORDINATE

Streamline VDC & BIM workflows with file coordination and automatic clash detection.

KEY CAPABILITIES:

- 3D model access & navigation
- Aggregate, filter & view models
- Create coordination spaces
- Automatic clash detection
- Clash matrix
- Model aggregation
- Issue management
- 2D & 3D compare

B AUTODESK® BIM 360® BUILD

Manage the creation and resolution of RFIs & Submittals and support proactive quality and safe management programs.

KEY CAPABILITIES:

- RFI & Submittal management
- Checklist templates
- Mobile inspections
- Issue management
- Root causes
- Daily logs
- Reporting & analytics

+ COST MANAGEMENT (add-on to BIM 360 Build)

Budget control & change order management

ADDITIONAL BIM 360 PRODUCTS SOLD SEPARATELY

B AUTODESK® BIM 360® PLAN

Software to build reliable work plans using lean construction principles.

B AUTODESK® BIM 360® OPS

Mobile-first maintenance management solution.

For more information on subscriptions and pricing:

autodesk.com/bim-360/pricing/

B AUTODESK® BIM 360® DOCS

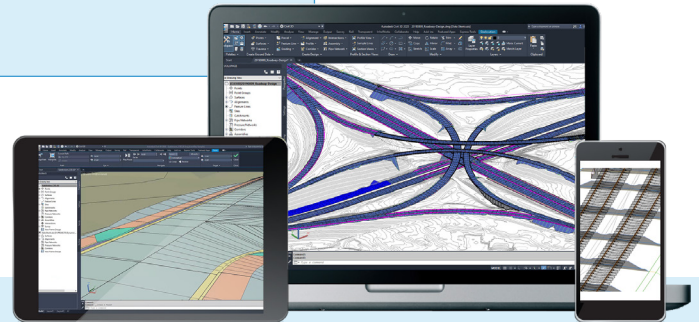

Securely publish and distribute construction drawings, documents, and models in a single, cloud-based repository.

KEY CAPABILITIES:

- Unlimited storage
- Document control & versioning for all file types
- Revit and AutoCAD Publishing
- 2D & 3D viewing & compare
- Document sets
- Approval workflow
- Design issues & markups
- Mobile access
- Reporting & analytics

Common Data Platform

Rather than working in siloed systems, BIM 360 integrates the entire project workflow from design through construction across one common data platform. Teams can easily transfer information from one phase to the next while housing all project information and data within a single solution.

Centralized Source of Truth

- Unified database with the most up to date information
- Eliminate multiple iterations and rework
- Deeper understanding of project data to help make informed business decisions

Easy Team Handoff

- Fast adoption from one team to the next
- Cloud based connectivity for mobile and desktop
- Accessible historical data

Improved Decision-Making

- Access to the right information at the right time
- All changes reflected in current state of published files
- Involve more stakeholders earlier on in the construction process
