*Recovery Begins Here*

## **Crisis Assessment, Recovery, and Empowerment**

### **Crisis Stabilization Hospital Diversion Facilities**

CARE centers provide a safe haven for individuals who are experiencing a mental health crisis and are in need of support, medication observation, and goal-oriented treatment planning.

Patients receive 24-hour support and supervision, daily individual and group services, and are formally assessed so their unique needs are addressed in accordance with their crisis and response plans. Length of stay depends on individual needs - typically 14 days or less, averaging 3-5 days. Our facilities help return the individual to their home or work environment as soon as the "crisis situation" has been stabilized.

**Tellurian CARE Centers provide crisis stabilization services, diverting patients from costly and restrictive institutional settings while providing a safe, comfortable, and home-like environment.**

### **Madison**

300 Femrite Drive, Madison, WI 53716

**(608)224-2500**

### **LaCrosse**

4647 Mormon Coulee Road, LaCrosse, WI 54601

**(608)519-3080**

**tellurian.org**

### **Our CARE Facilities:**

- Alleviate "crisis" symptoms
- Teach coping and independence skills
  - Promote recovery
- Provide referrals to community resources

Tellurian currently operates CARE Center facilities in Madison and LaCrosse, WI. CARE Centers are community-based residential facilities created to provide an alternative to institutional or hospital settings. CARE Centers are licensed under DHS34 crisis stabilization requirements.
