

My name is Raquel and I am a Community Engagement Specialist at the Gift of Life Marrow Registry. We are currently taking Internship applications for our Campus Ambassador Program (CAP) to help save the lives of people battling blood cancers.

***A little bit about us:*** Gift of Life is a nonprofit stem cell and marrow registry that facilitates life-saving transplants for patients battling blood cancers, like Leukemia and Lymphoma, as well as nearly 100 other inherited blood disorders, like sickle cell anemia.

***How can you help?*** Interns with Gift of Life help save lives by tabling on campus and presenting to clubs & orgs to educate students on the urgent need to grow the registry and then giving students the opportunity to join the registry.

Interning at Gift of Life is a great way to make an impact that lasts a lifetime. It also looks great on resumes and applications! We are very flexible with students work and school schedules and you can create your own schedule with this internship.

Here is the link to apply for the Campus Ambassador Program Internship:

<https://www.giftoflife.org/programs/capapp/20129>

**Applications close on July 1<sup>st</sup>** so I hope to see your application soon!

We also love volunteers! If your org needs service hours and are interested in running a donor drive on campus, please email me at [rmorales@giftoflife.org](mailto:rmorales@giftoflife.org) or call me at (561)982-2900, Ext.3057.

Thank You,  
Raquel Morales

Did you know every three minutes someone in the United States is diagnosed with blood cancer?  
Did you know that 80% of donors called upon by a transplant center are between the ages of 18 -35 years of age?  
Did you know that 90% of transplants are a stem cell collection and 10% are a bone marrow collection?  
Do you know the odds of you being able to find a matching donor are based on your ethnicity?

Campus Ambassador Program

YOU CAN HELP SAVE LIVES!

APPLICATIONS NOW OPEN FALL 2024

Participate in an on-campus internship that actually saves lives!

Gift of Life Marrow Registry finds matching blood stem cell and marrow transplant donors to save the lives of patients battling blood cancer, sickle cell, and inherited immune disorders.

As a Campus Ambassador, you will reach out to your peers about the urgent need to grow the registry and increase its diversity so that every patient can find a match, and invite them to join.

You can earn community service hours, build your résumé, receive training and mentorship, and there is nothing more rewarding than getting an email saying a donor you registered just saved someone's life.
