CNMT 120, Section 1 - Fall 2020 Syllabus

Professor:	Dr. Andy Felt		Office:	home
Office Hours:	MTRF	10:00 – 10:50 a.m.	email:	afelt@uwsp.edu
	or by arrangement			
	On Zoom			

Class Meetings (on Zoom): MW, 2:00-2:50; R, 2:00-3:50

Text: *Object-Oriented Data Structures Using Java*, 3rd ed., by Dale, Joyce, and Weems, ISBN 978-1-4496-1354-9, available from UWSP Text Rental.

Computer: You will need a computer (laptop or desktop) with a webcam and microphone, and enough internet bandwidth to stream videos. Your computer will also be needed for programming in Java in the Eclipse IDE.

Prerequisites: CNMT 110

Course Structure: This course will be delivered entirely online through the course management system Canvas. You can login to Canvas at the UWSP main web page.

Grading:

Lab Assignments	30%		92%	A,
Class Participation	5%		90%	A−,
Online Quizes	10%		88%	B+,
Exam I	25%		82%	B, etc.
Final Exam	30%			

Lab Assignments: Each lab should be turned-in in two formats:

- A single PDF for me to read.
- Zipped and uploaded java files, for me to test if necessary

No late homework is accepted for any reason. The lowest lab grade will be dropped.

Online Quizes: These are to be completed in Canvas after reading the corresponding chapter in the text. You will get 30 minutes to complete the quiz, with two tries, the grade from the *latest* try counting. The quiz will not be available after the due date. The lowest quiz grade will be dropped.

Exams: Exams will be cumulative, and will test your ability to write code, read code, and your understanding of the material from the book. Exams will be open-book and open-note, but you may not use help from any live source, including the internet or people connected in any manner. Exams must be ONLY your own work. You must join the Zoom call during your exam and leave your camera on.

Help: Everybody needs help at some point. The key is to *get help right away* when you need it. Here are some ways to get help:

- ask a question in class;
- ask me during office hours;
- ask me in an email;
- contact the course tutor.

Disability Accommodations: Reasonable accommodations are available for students who have a documented disability. Please notify the instructor during the first week of class of any accommodations needed for the course. All accommodations must be approved through Disability Services, located at 609 Learning Resources Center or https://www.uwsp.edu/datc/Pages/default.aspx.

General Course Policies:

- Everyone becomes ill sometimes. When illness or other emergencies require absence from class, I expect you to contact me immediately, preferably by email. I expect you to try to keep up with what is being taught by following in your book and doing the homework.
- **Academic Dishonesty:** You may discuss labs with each other, and you may seek help from the instructor and tutor. However, we want you to become an independent programmer, able to code on your own. Therefore, you must limit the amount of outside help you receive. You must not copy any part of another person's work, and you must not share any part of your work with others. If there is *any* doubt about the amount of help given or received, you should immediately consult with the instructor before submitting the assignment. Please see `https://www.uwsp.edu/dos/Pages/Student-Conduct.aspx` to read about your rights and responsibilities as a student, and Chapter 14 (at that page) to read about Wisconsin's academic misconduct code.
- The course materials and recordings are the property of the instructor, and may not be copied or recorded (including audio and video recording) without the instructor's permission. Students may not copy or share course materials, answers, or recordings outside of class, including posting on internet sites or selling to commercial entities. Students are also prohibited from providing or selling their personal notes to anyone else or being paid for taking notes by any person or commercial firm without the instructors express written permission. Unauthorized use of these copyrighted lecture materials and recordings constitutes copyright infringement.

Tentative Calendar is available at the Canvas site.
