

CLS 205: Clinical Orientation

Clinical Laboratory Science 205 is a one credit, one day, Pass/Fail clinical orientation program designed to introduce you to the real world of the medical laboratory. Some of you may or may not be uncertain about a career in Medical Technology, Cytology, or Histology and wish to see first-hand what the career entails. This experience will help you solidify your career decision. Others may wish to visit a desired hospital for the clinical practicum. CLS 205 is a great way to spend quality time in the laboratory of your choice observing and asking questions.

If you intend to register for the CLS 205 **contact your health care provider or UWSP Health Services NOW** to make an appointment **for a two-step TB skin test**. **Request a copy of the results and be ready to submit to the hospital upon request**. The test is valid for one year. Proof of having it completed (i.e., the results) is required.

Registration for the course will be ***completed during the fall semester***. ***Course requirements*** will be ***completed in January (winterim)***. You will first be asked to **choose one hospital** in which you wish to complete the shadowing experience. Please consider the following hospitals for the CLS 205 Clinical Orientation course.
