

Communication Sciences and Disorders (CS&D) 863: Implantable Protheses (2 credits)

University of Wisconsin-Madison
Department of Communicative Disorders
Fall Semester, 2021

Location: This course will be offered through in-person in Madison and distance learning for UW Stevens Point students

Professor Ruth Litovsky
Email: litovsky@waisman.wisc.edu
Office Phone: 608-262-5045
Mobile phone: 608-852-0616

Class meeting times: 2:30-4:10pm Wednesday

How do I get help outside of class?

- 1) **Canvas: download material.** Prepare for class, do your reading, review material, prepare for exams.
- 2) I can meet with students before or after class, or by appointment; please contact me by email for an appointment.

Readings:

Required texts [see if you can request an e-copy through the library]:

- a. Jace Wolfe (2020). Cochlear Implants: Audiologic Management and Considerations for Implantable Hearing Devices. Plural Publishing. ISBN 9781597568920.
- b. Rene Gifford (2020). Cochlear Implant Patient Assessment: Evaluation of Candidacy, Performance, and Outcomes. 2nd edition. Plural Publishing. ISBN 9781635501285.

Additional Readings (book chapters and original research articles) can be found on Canvas

Course Description:

This is a 2 credit graduate course, which is offered by the Department of Communicative Sciences and Disorders. It is typically taken by students in the AuD program during their 3rd year. The 2 credits are accomplished by attending 100 minutes of lecture per week for 14 weeks, or the equivalent effort. Students typically spend 2-3 hours outside of class per credit hour reading, preparing for lecture, studying for exams. In addition, students spend numerous hours outside of class researching their topic and preparing an end-of-semester presentation.

Learning Outcomes: Understand basic terminology, concepts, theories, and recent studies pertaining to implantable auditory protheses.

1. Students will know what are auditory implants?
2. Understand history, background, development of internal and external components.
3. Understand patient candidacy and outcomes.
4. Attain knowledge and basic background in programming philosophy and overview.
5. Learn basics regarding use of objective measures.
6. Choose a topics in the field and study that topic in preparation for a professional presentation

Course Policies:

- Class attendance is mandatory, unless students provide a reasonable explanation for missing class. Students are asked to provide the professor with advanced notice of planned absences via email. Students are required to make up material presented during missed class periods.
- If you observe religious holidays that conflict with course activities and wish to reschedule assignments or tests that may conflict with such an observance, please notify the instructor no later than two weeks after the beginning of the semester.

Policies that ensure courtesy to other students:

- **Students are here to learn. Please be respectful of this. Avoid side conversations during class. It's not only disruptive to other students, but to the instructor as well.**
- **If you own a mobile phone make sure it's turned off before class.**
 - **Do NOT use text messaging, IM, email, social networking, etc., during class.**
 - **If you must do so, please leave the room first.**
- **Laptop computer or electronic pads may be used during class to take notes.**

Course Evaluations

Students will be provided with an opportunity to evaluate this course and your learning experience.

Student participation is an integral component of this course, and your feedback is important to me. I strongly encourage you to participate in the course evaluation.

We will use Digital Course Evaluation (AEFIS). In most instances, you will receive an official email two weeks prior to the end of the semester when your course evaluation is available. You will receive a link to log into the course evaluation with your NetID where you can complete the evaluation and submit it, anonymously. Your participation is an integral component of this course, and your feedback is important to me. I strongly encourage you to participate in the course evaluation.

Academic Calendar & Religious Observances

- See: <https://secfac.wisc.edu/academic-calendar/#religious-observances>

Academic Integrity

By virtue of enrollment, each student agrees to uphold the high academic standards of the University of Wisconsin-Madison; academic misconduct is behavior that negatively impacts the integrity of the institution. Cheating, fabrication, plagiarism, unauthorized collaboration, and helping others commit these previously listed acts are examples of misconduct which may result in disciplinary action. Examples of disciplinary action include, but is not limited to, failure on the assignment/course, written reprimand, disciplinary probation, suspension, or expulsion.

Accommodations For Students With Disabilities Statement

The University of Wisconsin-Madison supports the right of all enrolled students to a full and equal educational opportunity. The Americans with Disabilities Act (ADA), Wisconsin State Statute (36.12), and UW-Madison policy (Faculty Document 1071) require that students with disabilities be reasonably accommodated in instruction and campus life. Reasonable accommodations for students with disabilities is a shared faculty and student responsibility. Students are expected to inform faculty [me] of their need for instructional accommodations by the end of the third week of the semester, or as soon as possible after a disability has been incurred or recognized. I will work either directly with you, or in coordination with the McBurney Center to identify and provide reasonable instructional accommodations. Disability information, including instructional accommodations as part of a student's educational record, is confidential and protected under FERPA.

Diversity & Inclusion Statement

Diversity is a source of strength, creativity, and innovation for UW-Madison. I value the contributions of each person and respect the profound ways their identity, culture, background, experience, status, abilities, and opinion enrich the university community. We all commit ourselves to the pursuit of excellence in teaching, research, outreach, and diversity as inextricably linked goals.

The University of Wisconsin fulfills its public mission by creating a welcoming and inclusive community for people from every background – people who as students, faculty, and staff serve Wisconsin and the world.

Usage of Audio Recorded Lectures Statement

Lecture materials and recordings are protected intellectual property at UW-Madison. Students in this course may use the materials and recordings for their personal use related to participation in this class. Students may also take notes solely for their personal use. If a lecture is not already recorded, you are not authorized to record my lectures without my permission unless you are considered by the university to be a qualified student with a disability requiring accommodation. Students may not copy or have lecture materials and recordings outside of class, including posting on internet sites or selling to commercial entities. Students are also prohibited from providing or selling their personal notes to anyone else or being paid for taking notes by any person or commercial firm without the instructor's express written permission. Unauthorized use of these copyrighted lecture materials and recordings constitutes copyright infringement and may be addressed under the university's policies, UWS Chapters 14 and 17, governing student academic and non-academic misconduct.

Grading: Grading is based on performance on 2 exams, 3 quizzes and 1 presentation. Grades are not curved. The total number of points that can be earned equal 300. The final grade will consist of the percentage of points out of 300, as follows:

UW Madison

A = 94-100%, **AB** = 89-93%, **B** = 84-88%, **BC** = 79-83%, **C** = 70-78%, **D** = 60-69%, **F** = 59% or less.

UW Stevens Point

A = 94-100, **A-** = 91-93, **B+** = 89-89, **B** = 84-88, **B-** = 81-83, **C+** = 79-80, **C** = 70-78, **D** = 60-69, **F** = 59 or less.

Exams: Two open-book take-home exams will be given during the semester. Each one is worth up to 100 points (200 points total). No proctoring will be required.

Presentation: 1 presentation at the end of the semester per student (100 points).

Preparing the Presentation:

During the last 3 weeks of the semester, students will give a 15-minute presentation. Each presentation will be based on a topic that the instructor approves in advance. The presentations are intended to focus on novel findings and outcomes with new programming or coding strategies in patients who use one of the following:

- 1) bone-anchored hearing aids
- 2) middle ear implants
- 3) cochlear implants (candidacy, complications, special populations, Usher Syndrome)
- 4) hybrid (cochlear implant + hearing aid)
- 5) single sided deafness (cochlear implant + normal ear)
- 6) brainstem implants

<http://www.advancedbionics.com/us/en/home.html>

<http://www.medel.com/us/>

Course Format:

Lectures, participation in discussion, presenting at the end of the semester. Students are responsible for all material covered in class and for all reading assignments. Students are encouraged to ask questions and participate in class discussion.

COURSE SCHEDULECourse Meeting Dates

9/8 (no in person class; see assignment), 9/15, 9/22, 9/29, 10/6, 10/13 [temporal bone lab in Madison at 5pm], 10/20, 10/27, 11/3, 11/10, 11/17, [11/24 – Day before Thanksgiving (we will discuss whether to hold class this day or on 12/15)], 12/8

- Exam 1: Take-home during the week of 10/24/21
- Exam 2: Take-home during finals week 12/13/21

Date	Topics Covered	Readings
Due by 9/10/2021 midnight	Between Sound and Silence: https://www.nytimes.com/2018/08/07/opinion/deafness-cochlear-implants.html	Assignment: Write a ~2 page essay. Are the patients in the movie deaf, hearing impaired, or neither? Thoughts about treatment with CIs, future possibilities
9/15	<ul style="list-style-type: none"> - Impact of deafness on the auditory system - Hair Cell Regeneration - Overview of CIs (if time allows) 	<u>Book:</u> Wolfe Ch. 1 Review Wolfe Ch. 3 for anatomy refresher <u>In readings folder:</u> Reiss (2020) Butler and Lomber (2013) Svirsky (2017) Rubel et al. (2013) Kral et al. (2016)
9/22	<ul style="list-style-type: none"> - Overview of CIs & History of CIs - Electrical stimulation - Basics in CIs 	<u>Book:</u> Wolfe Ch. 1-2 for background; Ch. 8 for coding strategies <u>In readings folder:</u> Wilson and Dorman (2008) Jeppesen and Faber (2013)
9/29	<ul style="list-style-type: none"> - Candidacy and Outcomes - BAHA, Middle ear implants, - Auditory Brainstem Implants 	<u>Book:</u> Wolfe, Ch. 25, 26, 27, 28 <u>In readings folder:</u> Purcell (2021) Mahendran (2021) Beiver (2020) Zwolan (2020) Holden (2019)

10/6	<ul style="list-style-type: none"> - Bilateral CIs - Electric-Acoustic (bimodal) - Single-Sided Deafness 	<p><u>Book:</u> Wolfe, Ch. 24</p> <p><u>In readings folder:</u> Litovsky (2018; SSD), Litovsky (2016) Dunn (2020) Bernstein (2019) Gifford (2017) Lenarz et al (2014) Hybrid Gantz et al. (2016) Hybrid</p>
	In preparation for upcoming presentations by CI company reps and clinicians,	please read chapters in the Gifford and Wolfe books. Start with: Wolfe ch. 7: terminology & fitting Wolfe ch. 14: programming
10/13	Presentation by Advanced Bionics rep.	Wolfe Ch. 9 & 15
10/20	Presentation on surgical approaches & temporal bone virtual lab Joseph Roche, MD	<i>Chapter by Francis on 'Anatomy of the temporal bone'</i>
10/27	Presentation by Cochlear rep. Courtney Wallace	Wolfe Ch. 10 & 16
11/3	Presentation by Med-El rep. Susan Trouba	Wolfe Ch. 11 & 17
11/10	Presentation on pediatric evaluation, candidacy and mapping. Melanie Buhr-Lawler, AuD CCC Guests: parents of children with CIs	Wolfe Ch. 6, 20 & Gifford book
11/17	Presentation on candidacy, evaluation and programming of older adults. Sara Misurelli, PhD, AuD CCC –	Wolfe Ch. 5, 20 & Gifford book
11/24	Student Presentations ?? Class held remotely (or 12/15)	See Canvas
12/1	– Dr. Litovsky in Seattle for ASA award	
12/8	Student Presentations	See Canvas

CFCC 2020 Standards

The following CFCC standards are completed in this course.

A4. Principles, methods, and applications of acoustics, psychoacoustics, and speech perception, with a focus on how each is impacted by hearing impairment throughout the life span

A10. Effects of hearing impairment on educational, vocational, social, and psychological function throughout the life span

A13. Principles of research and the application of evidence-based practice (i.e., scientific evidence, clinical expertise, and client/patient perspectives) for accurate and effective clinical decision making

A15. Client-centered, behavioral, cognitive, and integrative theories and methods of counseling and their relevance in audiologic rehabilitation.

A16. Principles and practices of client/patient/person/family-centered care, including the role and value of clients'/patients' narratives, clinician empathy, and shared decision making regarding treatment options and goals.

A17. Importance, value, and role of interprofessional communication and practice in patient care

B10. Identifying persons at risk for speech-language and/or cognitive disorders that may interfere with communication, health, education, and/or psychosocial function.

C1. Gathering, reviewing, and evaluating information from referral sources to facilitate assessment, planning, and identification of potential etiologic factors

C2. Obtaining a case history and client/patient narrative

C3. Obtaining client/patient-reported and/or caregiver-reported measures to assess function

C5. Providing assessments of tinnitus severity and its impact on patients' activities of daily living and quality of life.

D3. Facilitating and enhancing clients'/patients' and their families' understanding of, acceptance of, and adjustment to auditory and vestibular disorders.

D4. Enhancing clients'/patients' acceptance of and adjustment to hearing aids, hearing assistive technologies, and osseointegrated and other implantable devices

D9. Monitoring and evaluating client/patient progress and modifying counseling goals and approaches, as needed

E27. Providing intervention for central and peripheral vestibular deficits

E28. Ensuring treatment benefit and satisfaction by monitoring progress and assessing treatment outcome
