Course Meeting Time
2:00-3:15pm Tuesdays and Thursdays in TNR 271

Course Description

This course is designed to develop your planning vocabulary by building your understanding of the types of tools that planners use to accomplish community objectives. Specifically, this course will emphasize the local policy considerations involved in the creation and enforcement of regulatory and non-regulatory approaches to natural resource and land use planning. Through completion of course readings, participation in class discussions, and through involvement in analyzing local policy and preparing a written report, you will continue to develop your understanding of how planners can successfully implement a community's vision for the future. We will also focus on developing your technical and presentation skills as components of this course.

In addition to normal course activities, several guest lecturers also have been asked to participate in this course. These individuals bring expertise on key aspects of the planning process into the classroom that will be extremely beneficial to enhancing your understanding of the planning profession -- so make sure that you are prepared for these discussions!

Learning Objectives

This course is intended to provide students with an introduction to planning tools and regulatory approaches to implementing a community land use plan through the following learning objectives:

- Explore the relationship between land use plans and local government programs for regulating land uses and achieving plan goals and objectives
- Understand legal and political procedures associated with land use code development and enforcement.
- Develop skills in processing applications for land use changes, including zoning amendments, subdivisions, variances, and conditional uses.
- Critically consider alternative means for achieving a community's planning goals and objectives

Assignments and Grading

The course has a variety of assignments that will allow you to examine a topic or problem in greater detail. Following is an overview of the types of assignments / projects that you will complete this semester:

- I. **Participation in discussions during class and with guest speakers:** During the semester we will have regular discussions and a couple of field trips. You must attend to receive points.
 - a. 50 points
- II. **Canvas Discussions:** For each day indicated in the syllabus, you will need to create your own ~75-100 word primary commentary on the readings and question(s) that I pose. Then, you will need to comment on two other student's primary commentary.
 - a. 10 points each discussion – 100 points total
- III. **Plan Commission Meeting and Report:** This assignment focuses on understanding the politics, processes, and issues in a community when dealing with planning and zoning issues. Due by December 12th.
 - a. 50 points
- IV. **Staff Report:** This assignment introduces you to how staff of a community analyze land use, environmental and regulatory issues of projects and make recommendations. Due October 10.
 - a. 100 points
- V. **Other Topics Lightning Presentation:** In this assignment, you will investigate how a topic of interest is addressed through planning and zoning in a range of communities. December 7th.
 - a. 50 points
- VI. **Exams:** The two exams, a Midterm and a Final, will focus on the readings and lectures. These are fact-based exams.
 - a. 75 points each – 150 points total

Total points = 500

Potential Changes

The professor has the right to change aspects of this syllabus as the semester progresses.

Attendance

Class attendance is mandatory except with prior agreement. Unexcused absence from class negatively affects your learning and is disruptive to group projects. Your final grade will be reduced by 15 points for each absence during the semester.

Late Assignments

Papers turned in late will be assessed a 20% reduction penalty per day -- including weekends. All assignments (unless otherwise noted) are due at the time noted below or in a handout.

Academic Integrity, D2L, and turnitin.com

It is important for students to read and understand the academic honesty policy of UWSP. In addition to university policies any attempt to cheat, plagiarize, or take credit for work that is not your own will result in a zero on the assignment. As you may encounter a number of complicated questions regarding how to cite sources of information (e.g. spatial data, images, or community data), I encourage you to discuss any questions you may have about citation, paraphrasing, or related topics with me prior to turning in an assignment. In addition, assignments turned in through D2L drop box will be linked to turnitin.com – a program that compares your work to other sources to check for originality.

Accessibility Statement

If you have a learning or physical challenge which requires classroom accommodation, please contact the UWSP Disability Services office with your documentation as early as possible in the semester. 103 Student Services Center, (715) 346-3365; TTY (715) 346-3363;
