COURSE DESCRIPTION

The Social Work Practicum is a required component of the social work curriculum. It is the mechanism by which all elements of the curriculum may be tested, applied, and integrated. It builds upon the total social work curriculum and is the forum within which the student may exercise knowledge, values, skills, self-awareness, and self-evaluation. The Social Work Practicum involves placement of students in agencies under the direction of professional social workers who have agreed to act as Practicum Supervisors. The Practicum Supervisor, working together with the faculty Field Coordinator, provides the student with an opportunity to further integrate the knowledge, skills, and values necessary for social work practice.

Practicum is the final step in preparing students as entry-level social work practitioners. Beginning with an orientation to the agency and the relevant client systems, students gradually assume more independent responsibilities. Throughout this learning process, there is an emphasis on a systems approach to generalist practice as students work with and within systems of various sizes.

The Social Work Practicum (SW 494) must be taken for a total of eight credits (400 hours). Depending on student and agency needs, the student may do this during one semester or over the course of two semesters. Students must enroll in the Social Work Practicum Seminar (SW 495) each semester that they are in Practicum. This seminar involves weekly meetings and assignments designed to further integrate social work practice and theory to the agency setting, increase

knowledge of and identification with the social work profession, learn about community resources through interaction with other students, set goals, and process client and agency experiences with the Field Coordinator and other practicum students.

CORE COMPETENCIES AND EXPECTED LEARNING OUTCOMES

Graduates of the social work major are expected to demonstrate the integration and application of the ten core competences identified by the Council on Social Work Education (CSWE) as evidenced by their associated practice behaviors. Upon successful completion of the practicum and seminar, student should be able to demonstrate achievement of all of the expected knowledge, skills, and values-based learning outcomes identified in this section below. Practicum experiences and seminar content and assignments are designed to introduce, reinforce, and/or emphasize practice behaviors and assist students in developing the social work core competencies.

Students will be evaluated by the faculty Field Coordinator for the seminar component and collaboratively by the faculty Field Coordinator and the Practicum Supervisor for the practicum component. Practicum evaluation will be conducted by use of the Field Instrument, which evaluates student ability according to the CSWE practice behaviors.

RECOMMENDATIONS

1. Students are encouraged to keep a binder to aid in the collection of handouts, journal entries, resources and completed assignments. Part of being an effective social worker is the ability to be resourceful. As students progress through their internship, they are encouraged to collect community and educational resources.
2. Interns are encouraged to actively work on their documentation skills as part of their internship. Most agencies integrate this into the experience, but students should be prepared to seek out documentation opportunities. Examples of such opportunities include documenting client telephone contacts and face-to-face interactions, updating agency forms and manuals, taking notes at meetings, and assisting with grant writing.
3. Interns are encouraged to visit other agencies throughout the course of the semester. An important part of learning about the internship host agency is learning about affiliated resources. Interns may want to take tours of other related agencies, gather brochures and other literature, and/or schedule meetings with workers to learn about their programs.
