If you send me an email about missing quizzes, assignments, etc, and for some reason do not hear from me (email may have gotten lost or sent to spam) then it is your responsibility to come to office hours. Do not delay!

Course Description: Overview of underlying theory of climate change and its impact on water resources. Discussion of climate change politics and policy. This course is designated as the Environmental Responsibility part of the General Education Program (GEP)

Learner Outcomes: After attending lectures, participating in online discussions and the assessments, students will be able to do the following: 1) Identify interactions between human society and the natural environment; 2)

Analyze the individual, social, cultural, and ecological factors that influence environmental sustainability; and 3) Evaluate competing claims that inform environmental debates

I. Participation/Discussions

Professional behavior is expected toward your classmates and instructor. It is ***highly unusual*** that there is a problem of this nature. Slurs against a person's gender, race, religion, sexual orientation, political affiliation or essentially attacks against a person are not tolerated in this class or on this campus (and in professional settings). This requirement does not restrict your freedom of speech associated with expressing your opinion. Learning how to express opposing opinions without becoming emotive or insulting is an excellent skill to acquire.

If disruptive behavior is identified in the online class environment or via email and it is not corrected, then it may be followed by removal of your extra credit and/or a deduction of 10 percent (or more) of your final grade. Extreme measures can result in a discussion with the Dean of Students.
