# WDMD Students and Operation Photo Rescue:
An evolution of JIT teaching methods to improve student performance

Katie Stern, Associate Professor of Web and Digital Media Development
Dept. of Computing and New Media Technologies (CNMT)
kstern@uwsp.edu

What's your biggest teaching challenge?

Why can't they DO this?

Plan for today

- **Introduction to Operation Photo Rescue**
- **History of the WDMD 202 project**
- **Changes I've made and their results**
  - A few exercises for your greatest challenge
- **Future plans and lingering questions**

- **Operation Photo Rescue Story**

Cedar Rapids, Iowa
 - the city that couldn't flood
        Until June 2008

Photo by Staff Sgt. Oscar Sanchez-Alvarez, U.S. Air Force, via Wikimedia Commons

Photo by Don Becker, USGS [Public domain],
via Wikimedia Commons

- Worst flood in city's history
- Hundreds of city blocks were affected
- Thousands of people were evacuated

OPR and UWSP

Teaching Methods and Observations

- **Ongoing project for 4 years**
- **Basic skills taught in:**
  - WDMD 100 (observational)
 - WDMD 200 (observational and technical)

Project Goals for Students

- **Become an OPR volunteer**
- **Requires both technical and observational skills**
  - Use retouching tools and methods in Photoshop
  - Select the right tool and method for the job
 - Sharpen observational skills

Year 1

- **Procedure**
  - Showed the photo
  - Demonstrated tools and techniques
  - Let students work

Year 1

- **Grading**
  - Notes, notes, notes to students
  - Same mistakes over and over
  - This isn't going so well!

Year 2

- **Procedure**
  - Showed this photo
  - Demonstrated tools and techniques
  - Let students work and frequently jumped in for personal demos
    - Students loved personal demos
   - Students forgot personal demos

Year 2

- **Grading**
  - Notes, notes, notes to students
  - Created a checklist to copy/paste comments into D2L Grades section

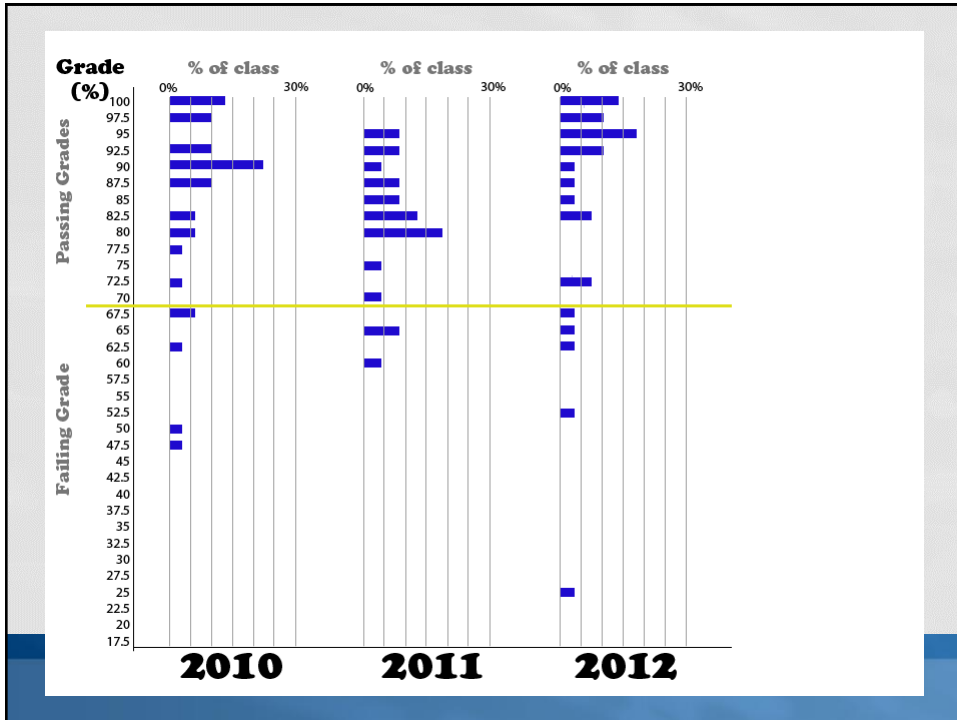

Year 3

- **Procedure**
  - Showed this photo
  - Demonstrated tools and techniques
  - Handed out grading checklist

Year 3

- **Grading**
  - Circled errors on checklist and added notes as needed

Feedback from OPR

- Very pleased to have new volunteers
- UWSP volunteer work on new photos was satisfactory the first time around

Year 4

- **Procedure**
  - Showed this photo
  - Demonstrated tools and techniques
  - Handed out grading checklist
  - Predicted technical questions
  - Created Camtasia Relay videos

Year 4

- **Video planning**
  - Inventoried skills required to accomplish a task
    - Select pixels
    - Copy and paste to a new layer
    - Edit size
    - Edit value (brightness)
    - Layer mask
    - Etc., etc.
- **Let's try it!**

Year 4

- **Video planning**
  - Inventoried skills required to accomplish a task
  - Reviewed my own teaching of those skills
- **Let's try it!**

Year 4

- **Video planning**
  - Scripted what I would do and say
   - Made sure to include "why" as well as "how"
    - Tried not to assume any prior knowledge
    - Tried to select a variety of mini-projects that covered different skills and techniques

Year 4

- **Created the Camtasia Relay videos**
  - Camtasia Relay is available to all professors
  - Check with the IT Help Desk on how to install and use
  - Minimal practice for each video
- **Placed video quicklinks in Content section of D2L**
- **E-mailed the quicklinks to students**

What do these results show?

- **Deeper learning? Hmm…**
  - Technical or observational skills?
  - What did the students think?

"I think that photos are a priceless memory and keepsake. For there to be an organization who helps others when those memories get destroyed or damaged is outstanding. I love that I was given the opportunity to learn about this organization and learn how to do the process myself…."

"The OPR photos we were exposed to in class were part of an enriching learning experience. These photos represented real lives and real feeling of a diverse group of people. We, WDMD students, could express our own emotions through the retouching of these photos. I know I tried to be as precise as I could because I had an idea in the back of my mind that who ever photo I was working on would be greatly appreciated…."
