

Sustainable Living: Books and Other Resources to Help You Be “Greener”

On June 16, 2008, the Stevens Point City Council unanimously voted to designate Stevens Point as an Eco-Municipality (see www.sustainablepoint.org). ***In that spirit, the library has produced this booklet listing some resources that will help people live a greener lifestyle.***

The booklet is divided into several sections:

- Science, general background and reference
- Buildings
- Transportation
- Lifestyle and Philosophy
- Food and Farming
- Community Action (local, national and global)
- Magazines
- Books for younger readers
- Videos
- Electronic sources of information

All items are available at or through the Portage County Public Library, 1001 Main Street, Stevens Point with branches in Plover, Almond and Rosholt.

The “call numbers” after each item indicate location. Most books are in the circulating collection at the Charles M. White Library Building in Stevens Point. The letter R in front of a call number indicates that the book is a non-circulating item in the Reference Collection. A plus sign (+) in front of the number means that the item is in the Children’s Department. Some books may be checked out or temporarily housed in one of the branches. Check our catalog or ask at the desk for current status.

Electronic sources of information:

For recent magazine and newspaper articles on the environment (or any other subject for that matter), try *EBSCOhost* or *ProQuest*. These databases will let you read the full text of articles from thousands of magazines and newspapers. From the library's website (www.pcpl.lib.wi.us) click on "Databases..." Then click on the words "connect now" next to the database you want. If you are doing this from home, you will need your library card number. Both of these databases are made available through the Wisconsin Dept. of Public Instruction and you can also connect to them through BadgerLink: www.badgerlink.net.

When using the library's computer catalog try the following subjects:

- Building—Energy Conservation
- Climate Change
- Ecological Houses
- Energy Conservation
- Environmentalism
- Global Warming
- Green Products
