Schmeeckle Reserve's Spring Scavenger Hunt

Become a natural detective to discover these patterns and pieces of nature!

Animal tracks

April showers bring May flowers...and lots of mud to perfectly capture the prints of Schmeeckle Reserve's wildlife. Take a closer look at where you're stepping next time you head out on a walk through the Reserve--you just might stumble across a path already trodden by our deer, rabbit, or bird friends. The more, the merrier!

Flowers

Springtime flowers in Schmeeckle are not something that you'll want to miss! From daisies to dandelions to lucky clover, these spring colors are a sight to see (and smell). Our 280 acres hold many native species of flowers that benefit our pollinators. Be sure to thank them for their beauty and environmental benefits during your hunt!

Trees

Our happy forest hold pine trees, oak trees, aspen trees, and more! The new and old greenery brings habitat and food for our wildlife, as well as refreshing color to welcome our new season in and shake the winter greys away. Hug a tree today, you'll be sure to feel the love!

Patterns

Nature holds so many different patterns. Be sure to bring a journal out with you during your hunt to observe and record the beauty within the seemingly ordinary! Whether it may be rings from trees, ripples from water, or spirals from snail shells, the beauty of Schmeeckle Reserve is hidden everywhere.
