

Distance from Urban Features

Map 6.4

Calumet County, Wisconsin

Targeting Priority Working Lands Pilot Project

Map Description

This map displays the scoring criteria based on the distance from urban features and boundaries. This criteria evaluates working lands based on the influence that urban areas have on adjacent lands. Areas where cities and villages are in close proximity or have made financial investments or plans are less likely and less appropriate to remain as productive working lands.

Methods

The following criteria were applied in developing this analysis:

- Working lands within sewer service areas or existing city and village boundaries receive 0 points
- Working lands within a growth management area receive 25 points
- Working lands within a planning area boundary receive 50 points
- Working lands within the 1/2 mile extraterritorial area receive 80 points
- Working lands outside 1/2 mile extraterritorial area receive 100 Points
