

UNITED STATES COAST GUARD

October 21, 1943

Dearest Folks

this has to be short, but I want to let you know what is what.

In the first place I am definitely going to Radio Technicians school in New York. I certainly am thankful for the opportunity, I hope that I make the most of it.

I went to see the Regimental Commandant about getting delayed travel time so that I could stop over home for a few days, but he told me that when I graduate from school I get 10 days and if I got delayed travel time it would be deducted from the liberty I get on graduation. But he said that the day we leave I can find out when we pass thru Denver so I might meet you there for a few hours anyway. I shall wire the time. If it is not convenient do not try to make it because it would probably be for a short time. It certainly would be swell tho if it were possible. I certainly hope so.

UNITED STATES COAST GUARD

today as I was walking back from Chow (very good - today) a fella came up to me and asked me if I knew him. It was Gordon Hill - It certainly was a surprise to see him. We just arrived here Monday for his boat camp. He certainly does remind me of his father. It sure was good to see someone that I knew.

I have to cut this off for I have to go on a watch in about 10 minutes.

I think of you often, and hope that we may be together for a short time soon

Love
Jim
