

- if no more times all between 2 - 22 October 1945

Dearest Folks - and times all here, everything is all
and I have just finished eating an egg sandwich
and it was good! We have been getting fresh eggs off
the old lady, and whenever we need to try and to
get a couple to take out on watch with me - they always
seem to taste better. Made over the hot plate we have
out here in the boat hut. than they do when
the cook puts them on for breakfast all here. The all
right watch tonight (under the lights set up here, we
have inaugurated) and as I was not able to write
yesterday I wanted to get this written today. It is
nice out here in the hut - the radio is on and so
they are playing some symphonies recordings. It
has just stopped raining and then the west the
wind blows - it smells good too. When the first
of the month comes it shall be more quiet than now,
for effective that date we shall continue 24 hours
communication watches. It does not affect our local operation
but it does give the radio men a break. They
shall stand only 5 minutes of every hour from 6 AM to
8 PM, just to see if there ^{are} any messages for us. It is
going to be good not to hear code, static and etc. at
all the time. Love you, watch good!

Starting in the morning - if it doesn't rain -
we are going to start spraying the outside of the huts. The
boat hut is already done - we painted it white some time ago,
and we are going to paint the others green.

240, This afternoon I mounted the paint spray out fit -
the air compressor, and the paint and turpentine.
That way every thing shall be on the truck and
it won't be necessary to go here for this - have done
one pull the air compressor ahead, or any thing like
that. It also shall make it possible for just two or three
men at the most to do the job. We needed 6 fellows when
we did the loan hut. It should be possible to do two
and possibly three huts in one. But if so we can't
complete the job in two days for the six huts. That is
if the weather stays nice for that long a time. I
at the end including a photo one of the Radio, the top
of the 5 tubes. It was taken one evening just after I
threw off the all night watch so if you don't recognize me
you'll know why. It was similar to the one I
brought yesterday. We went again to the usual
base chapel for a church. It was a good service and the
chapel gave a good sermon - it did me good. The
attendance was quite well for the 1st service for these
weeks about 50 or 200 men there! I was glad to see
I was thankful for the feeling of the whole of the
and all of you. My hope is to continue to bring you
together, as one, as was used at the top of the
! hope that lots of love and
- was used to it - similar effort, similar?
at. Now all the things all night. The Albertson R576
opposite was at the time of the - was used at the top of the
and we are going to bring it to the top of the
