Wood County Department of Social Services.....115

We are pleased to present this placement manual and description of the Social Work/Applied Sociology internship program at UW-SP. The objectives of this manual are to: (1) aid in orienting students and agency supervisors to the structure and mechanics of field placements; and (2) inform all parties of the expectations and responsibilities of the students, agencies, and the university.

Community agencies desiring interns in field placements are encouraged to contact the Field Placement Coordinator in the Sociology Department to discuss possible affiliation.

Since most of the agency information was supplied by agency supervisors, a special note of thanks is directed toward these agencies and their staffs.
